01

Overview

Boario

The objective of our game is that the player will control Boario. On a mission to get their villages' riches back from the evil Bearon. This will involve traversing through levels towards a main goal, but having opportunities for the player to explore for extra collectibles, which would lead to a different narrative ending.

Concepts & Objectives

Inputs

Run, Jump, and Attack to get through the level

Collectibles

Collect treasure along the way for narrative differences

```
using UnityEngine;

public class Collectible : MonoBehaviour
{
    [SerializeField] int scoreValue = 10; // Points this collectible gives

    private void OnTriggerEnter2D(Collider2D collision)
    {
        Debug.Log("Triggered with: " + collision.name);
        // Check if the object that touched us is tagged "Player"
        if (collision.CompareTag("Player"))
        {
            // Find the ScoreKeeper in the scene and add score
            ScoreKeeper scoreKeeper = FindObjectOfType<ScoreKeeper>();
            if (scoreKeeper != null)
            {
                scoreKeeper.AddScore(scoreValue);
            }
            // Destroy collectible after collecting
            Destroy(gameObject);
        }
    }
}
```

Robert

Majority of the scripts for Boario
(Moving, Charging, CLimbing, etc.)

Enemy scripts

Charging UI

Sound effects

Julian

Composed Game music

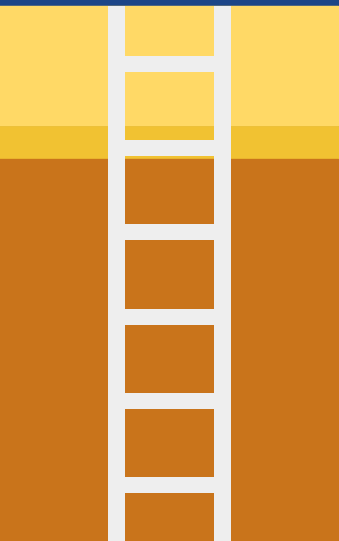

Created enemy art

Created the game UI code/visual
element for the score

Challenges & Solutions

Diagnostics

Issue	Teammate	Fix	Software	Score
Sprite Revision	Lucas	Heavily reworked main sprite	Aseprite	89/100
Checkpoint	Robert	Made an invisible checkpoint where the player spawns	Unity	95/100
No Code for the UI	Julian	Created the C# code for it	Visual Studio/Unity	85/100
Branches	All	Learning how branches work before we bricked the project	GitHub Desktop	100/100

Team Work

Lucas

I came to all classes and was readily available through online communications.

Team Work

Original Project:

Robert

I created a different game for this final project 4 weeks in advance. When I got changed to this group, I proposed that we take the game i had already and change some of the movement/mechanic scripts to adapt to the project idea. I was also able to communicate with my teammates very well during the project period.

Team Work

Julian

I composed all of the music, made enemy assets and created the UI script. Communicated with my team online as often as i could
